EXAMINER

GEORGE, PATRICIA ANN

ART UNIT PAPER NUMBER

1765

DATE MAILED: 02/13/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)	
	10/811,622	MACE ET AL.	
	Examiner	Art Unit	
	Patricia A. George	1765	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 March 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-10 is/are pending in the application.
- 4a) Of the above claim(s) 9 and 10 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☐ Claim(s) _____ is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Election/Restrictions

Claims 9-10 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 11/30/05.

Claim Objections

Claim 8 objected to because of the following informalities: Claim 8 indicates it is dependent on claim 8. For examination purposes, it is assumed the applicants intended to reference claim 8 as being dependent on claim 7. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term "selected from the group comprising" is not proper Markush language.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, and 3-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Yano et al of USPN 6,454,819.

Yano discloses an aqueous composition used for manufacture of various semiconductor device (col.1, l.27-28) including films of (col.12, l.56) tungsten (col.12, l.col.12, l.61) or titanium (col.12, l.65) comprising: 5 wt% fumed silica abrasives commonly known and available by the trade name of Aerosil #90, a product of Nihon Aerosil Co., Ltd. (col.18, l.2-5) which is labeled by the size of the surface area and in this case the name indicates a surface area of greater than 90m.sup.2/g (evidenced by the manufactures' trade product description: Aerosil ® 90, enclosed); 0.1-15% oxidizing agents(col.11, l.1); 0.01-5% chelating agents (col.11, l.27-29); water (col.24, l.63); and 0.1-10.0% organic or inorganic acids (col.11, l.48-49) that are complexing agents used to improve the polishing rate (col.11, l.32).

The disclosure of acid in the slurry solution is considered to read on applicant's limitation of "has only been exposed to an acidic pH."

As for claim 3 wherein the oxidizer is an iodate, Yano specifically mentions potassium iodate and the like in column 10, line 56.

As for claim 4, Yano discloses the use of phosphoric acid or the like in column 12, line 46.

As for claim 5, Yano discloses no restrictions as to chelating agents (col.11, line 10-11) including use of many types of carboxylic acid containing compounds such as glutamic acid (col.11, l.32-42).

As for claim 6, Yano discloses the pH of an aqueous composition is preferably determined as appropriate in consideration of the working surface, (col.12, l.52-52) and goes on to teach examples 6b-10B which all have a pH of 3.5, as claimed.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yano et al of USPN 6,454,819 (see above) in view of Degussa (sales brochure for Hydrophilic Fumed Silicas).

Although Yano clearly teaches use of Aerosal ® 90 abrasives (prepared in acid), Yano does not teach the use of 130 m.sup.2/g abrasives, as in claim 2.

The company, Degussa, widely advertises and makes help readily available for use of abrasives with surface areas of greater than 130 m.sup.2/g.

It would have been obvious to one of ordinary skill in the art at the time of invention was made, to use CMP abrasives with surface areas of greater than 130 m.sup.2/g, as Degussa's, in a CMP slurry, such as Yano's, because they are advertised and readily available.

Claim Rejections - 35 USC § 103

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yano et al of USPN 6,454,819 (see above) in view of Misra et al. of USPN 6,530,967.

Yano teaches tungsten CMP slurry with organic peroxides (col.10, l.51) are combined with organic acids, such as lactic acid in quantities of 0.01-5% (col.11, 28-38).

Yano does not teach use of potassium pyrophosphate.

Misra et al teaches the use of potassium pyrophosphate as a stabilizer for the peroxide in tungsten CMP slurry. Misra teaches the amount of the stabilizer may vary to provide better stabilization (col.6, l.29-31), and also cites 0.1%, as claimed (see figure 5).

It would have been obvious to one of ordinary skill in the art at the time of invention was made, to include potassium pyrophosphate as a stabilizer in the CMP

Art Unit: 1765

slurry disclosed by Yano, because Misra teaches it will reduce the decomposition of the peroxygen compound in the slurry composition.

Claim Rejections - 35 USC § 103

Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yano et al of USPN 6,454,819 and Misra et al. of USPN 6471745, see discussion above, in view of Degussa (sales brochure for Hydrophilic Fumed Silicas).

As for claim 8, see discussion above on surface area of abrasives, toward applicants' claim 2.

It would have been obvious to one of ordinary skill in the art at the time of invention was made, to use CMP abrasives with surface areas of greater than 130 m.sup.2/g, as Degussa's, in a CMP slurry, such as Yano's, because they are advertised and readily available.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: USPN 5,997,764.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patricia (Patty) George whose telephone number is (571)272-5955. The examiner can normally be reached on weekdays between 7:00am and 4:30pm.

Art Unit: 1765

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nadine Norton can be reached on (571)272-1465. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
